It is very important to supply high quality figures in a form suitable for reproduction. All figures, tables, illustrations, photographs should be prepared in such a way that they could be

printed in a single column size with a width of 3 1/4 inches or 8.25 cm. Use 14 ARIAL BOLD font for legends and 12 ARIAL font for numbering/wordings in figures, use the same font for all figures. Only if absolutely necessary should figures/tables/photos occupy double columns. Each figure must be referred to in the text and will be printed in black and white unless otherwise instructed by the authors. Each Figure should be submitted on a separate sheet and marked with the name of the author, title of manuscript and figure number. All formulae and figures should be carefully drafted and never drawn freehand. High quality original figures and glossy prints of all photographs are required. Photocopies of the figures and photographs are not acceptable.

MANUSCRIPT PROCESSING FEES: (no publication fees)

Authors should understand that there are many occurring publishing expenses per journal page associated with manuscript processing, editorial, production, type setting, printing, paper, binding, shipping, web-hosting, and archiving. However authors pay **no publication fees** as well as the costs of any color figure/illustration in a print edition to American Scientific Publishers whatsoever, therefore, publisher is doing all services to authors free of costs and/or at fractional costs, hence, publisher is not obligated to provide any hard/softcopies of journal issue and/or research article to anyone whatsoever.

FREE COLOR PRINTING:

Color illustrations are most welcome by the journal as they are effective in conveying complex graphs and photographs. Free color printing at the Editor-in-Chief's discretion, will provide an opportunity to publish color figures/illustrations in print at NO COST to the authors.

TABLES:

Each table must be referred to in the text. Each table should be typed double-spaced on a separate sheet and identified sequentially by Arabic numerals corresponding to the order in which they appear in the text. Each table should have a brief explanatory title, which should be labeled unambiguously. The position of each table should be clearly marked in the text.

UNITS:

Internationally accepted units of measurement must be used. The units of measurement are used in conjunction with their numerical values; the units should be abbreviated as suggested

below. If more commonly used units are adopted, conversion factors should be given at their first occurrence. Greek symbols may be used.

%, °C, nm, μm (not m), mm, cm, cm³, m, h (or hr), min, s (or sec), μg, mg, g (or gm), kg, cal, kcal, in. (or write out inch), ml [write out liter(s)].

The American Physical Society style guide can be used as a general reference on matter of units, grammar and formatting.

REFERENCES:

References should be in the proper format on a separate page, numbered in the sequence in which they occur in the text. Cite references numerically as superscripts in the text and list at the end of the manuscript. Do not use abstracts and websites as references. References to papers accepted but not yet published should be designated as "in press". Information from manuscripts submitted but not accepted should be cited in the text as "unpublished observations" with written permission from the source. Avoid citing a "personal communication" unless it provides essential information not available from a public source. For scientific articles, authors should obtain written permission and confirmation of accuracy from the source of a personal communication. References should be listed in the following style. The references must be verified by the authors against the original documents.

Authors must *use either full journal title or correct abbreviated journal titles* in the reference list. **Do not use "et al"** in references instead the names of all authors should be included in all references.
